Meeting of Village Council

Town to Run Rink—Art Heywood Hired
as Caretaker—Rink to Be Completed.

The regular monthly meeting of
the Village Council was held in the
Fire Hall on Monday evening of
this week. The matter was discussed
as to whether the Village take charge
of operating the rink this season,
in view of complaints received from
many of the citizens of the way in
which the rink has been managed
in the past.

It was decided that the Council
would operate the rink, with the
idea of giving the children of the
community every opportunity of
skating during the season as well
as the adults. Regulations for hours
of skating were drawn up and will
be posted at the rink.

Season tickets may be obtained
at the Secretary's office, and the
different rates to be charged, adver-
tised in the local paper.

No hockey sticks will be allowed
on the ice except on Tuesdays, 4 to
6 o'clock and from 2 to 4 o'clock on
Saturdays for children only.

An application to take charge of
the rink was received from Arthur
Heywood and accepted at \$25.00
per month, his duties to commence
as soon as weather permits the mak-
ing of ice. The season will be opened
with a carnival and its the wish of
the Council that the citizens of the
community give the children a real
winter of healthy recreation.

A large delegation of citizens were
present, urging every consideration
be given to the interests of the chil-
dren, and that the rink be made
ready as soon as possible.

The lumber, for the completion
of the fence at the rink, has not
yet arrived but the Council agreed
that as soon as it arrived a number
of ratepayers would be employed to
complete the job.

The remainder of the meeting
was of a routine nature.

Jolly Halloween Party

The high school students of Prince
Gish's room held a very en-
joyable Halloween party in the
Masonic hall on Friday evening
when each student was host to a
friend. About thirty five were pres-
ent.

Remembrance Day Service

The Veterans will meet at the
Masonic Hall on Sunday afternoon
at 2.45 p.m. for the purpose of at-
tending Armistice Service in the
Anglican Church. Medals to be
worn.

Armistice Dance

The Crossfield Legion will hold
their annual Armistice Dance in the
U. F. A. Hall on Monday Nov. 11.
Music by Joe Ferguson and his Cal-
gary Buckaroos. \$10.00 in cash will
be given to the holder of the lucky
ticket. Admission 50 cents, lunch
included.

Donnie Stars With Black Hawks

Donnie McEadyen, who last year
played the utility role for the Chi-
cago Black Hawks, is now playing
regularly on right wing, and in ex-
hibition games has been going great
guns, scoring two goals in a recent
match.

Coal Dealers Get a Break

Coal dealers did a rushing business
on Saturday, when three car loads
of coal were unloaded and then
there was not enough coal to supply
the demand. The cold snap caught
many farmers as well as townspeople
with empty bins.

Frank Ruddy has blossomed out
again as a coal dealer, and unloaded
his first car of the season on Sat.

Christmas Cards

A nice line of personal Christ-
mas cards has arrived at the Chron-
icle Office. \$1.00 and up, printed.

Hughie Pulls a Fast One

Hughie (R. B.) McIntyre got one
last stroke in under the conservative
regime. On reaching Avonmore he
found his name on the voters list
so he proudly walked up and cast
his vote. Nice going Hughie.

District Agriculturists Let Out

The District Agriculturists in
Alberta have been doing great work
for the grain and livestock growers
of the Province. The swine and calf
clubs, school fairs and district fairs,
have, to a large extent, been the re-
sult of the work of these highly
trained men.

Parts of the Province, and this
includes our district surrounding
Calgary, have never had the benefit
of one of these men until Mr. Gris-
dale was appointed Minister of
Agriculture. He immediately re-or-
ganized all the districts and appoint-
ed four more, making a total of
fourteen. Mr. E. W. Brundsen of
Calgary, was appointed for this dis-
trict and we all know the good
work he did in his first season.

Now Mr. Aberhart firesthe whole
fourteen, although ten have been
in the department for years, saying
that the Reid Government had
made no provision in this years es-
timates to pay them or their expen-
ses.

On page 28 of the 1935 estimates
vote number 125, we find that a
total of \$58,730.00 was appropriated
to cover the salaries and expenses
of 14 district agriculturists. The
salary and expenses of the Minister
is put through in the same way on
page 23 vote number 101 but he has
not been fired.

Either Mr. Aberhart did not take
the trouble to read the estimates,
which is hardly probable, or he is
deliberately trying to fool the pub-
lic by misrepresentation.

Nobody should, or will object to
releasing employees that are not
needed. We expect our public men
to eliminate waste if it exists. Opin-
ions are bound to differ as to what
services are or are not necessary,
but surely that is no reason for
making such untrue statements.

And this is the man that was
going to put "honesty" into the
statements of public men.

British Millers Squeezed When Wheat Price Set

A report dated October 16 from
the British Correspondent of North
Western Miller, says the British
Millers were squeezed bad when
they were caught "short" on the
Winnipeg grain market by the fixed
price on wheat set by the Bennett
Government. The Correspondent
says there are conflicting reports
regarding the reason, one being that
they were hedging purchases from
Russia and elsewhere, while the
other is that they were deliberately
selling short.

Neither is sufficient reason for
"outside" interests to invade the
Winnipeg market, selling short or
buying long, millions of bushels and
thus jeopardizing the price of West-
ern Canada's basic product.

The price of bread immediately
was raised in Canada as well as in
Britain as a result of this loss. The
consumer is always called upon to
foot the bill in case of loss.

The Bennett Government's action
was very timely when you consider
what ten or fifteen cents per bushel
meant to the Western wheat grower
and indirectly to all of Canada.

However, we feel that was only
a start and further action is neces-
sary, not only by Canada but by all
the grain growing countries.

A few years ago speculating in
futures was restricted on some mar-
kets in quantities greater than one
or two million bushels. This may
have helped but if it did, it proved
without doubt the extent to which
this form of speculating is carried
on and the influence such transac-
tions have had on the price.

We think Premier King should
set an example to the other grain
countries of the world, by imple-
menting the Grain Act and limit
all transactions on any grain market
to "actual sales". This action is in-
evitable and here is a chance for
our new Government to perform
a master service to the Canadian
people as a whole and the grain
grower in particular.

"SASKAL" TEA

To Settle An Issue

There are few people in Western Canada, and in the east as well for that matter, who will not follow with lively interest the proceedings before the Royal Commission appointed by the Saskatchewan Government to inquire into all the circumstances surrounding the "On to Ottawa" trek of relief camp strikers, which started out from Vancouver this summer and culminated in the Dominion Day rioting in Regina, in which a city police detective lost his life and scores were injured.

The inquiry, which is to be held in Regina may be regarded as an event of major importance to the whole country, in view of the fact that charges have been made public that the purpose and intent of the movement was to upset the constituted government of Canada and to impose on the country a government by unlawful means.

This has been denied by the strikers' leaders, who have insistently declared that their purpose was peaceful and inspired only with the desire to draw their grievances to the attention of the Federal government and the people in the hope that by this means these grievances would be remedied.

Which is correct, the charge or the denial, the people at large have no means of knowing at the present time, but it is sincerely to be hoped that sufficient evidence will be brought before the Commission to settle the question definitely one way or the other.

The charge, of course, is a serious one, since, if true, it involves a serious threat to the democratic form of government which has been bequeathed to the people of Canada and has been carefully fostered and cherished by them since Confederation. The whole trend of the history of the country since that date has been to bulwark and strengthen that form of government which decrees that at periodic intervals the people of the country shall decide by their ballots at the polls, whether administrative policies they desire.

On the other hand, if there is no truth in the charge, the public is entitled to know it. During their advance through the provinces of British Columbia, Alberta and Saskatchewan as far as Regina, the young men making their way towards Ottawa gained a measure of sympathy and support from a section of the public.

Those who assisted the leaders on their trip to the capital in the belief that it was a peaceful delegation to supplicate the government to terminate certain grievances, whether those grievances were real or fancied, will want to know whether their confidence was misplaced or not.

Those young men who joined the movement in a spirit of youthful adventure as the strikers progressed through the western provinces, as is alleged many of them did on the assumption that it was a peaceful and law-abiding pilgrimage, will also want to know whether they were bound on an innocent quest or were unwitting and pliable tools in the hands of a menacing leadership, as has also been alleged.

These are matters which should be cleared up definitely and finally for the sake of the peace of mind of the public generally and for the information of participants in the march and of those who sympathized with them and aided them.

There is only one way, however, for these questions to be definitely determined and that is by all those who have specific information on the movement and its motives to come forward and offer their testimony without fear or favor. Such information, no matter what it may be, provided it is reliable, will, it is safe to say, be welcomed by the Commission and the public.

It must be borne in mind that the Commission is purely a fact-finding body. It is not charged with the duty of drawing conclusions from the evidence adduced, or of making recommendations as a result of the information it receives.

The Commission's duties are confined to bringing out whatever facts they and their counsel may be able to secure and, while, no doubt, every effort will be made to gain as much information as possible, the value of the Commission's work to the public will be limited to the extent that such information is made available.

If those who have important information on the subject matter of the inquiry, neglect to bring it to the Commission's attention, to that extent the investigation will necessarily fail to fulfill its full purpose and to that degree the inquiry will be disappointing.

No matter how economically handled a Royal Commission inquiry is bound to involve considerable expenditure and it is to be hoped that those who have information of value will submit it and help the public to secure a good return for the expense entailed.

Prime Minister Joseph G. Coates announced completion of arrangements with Pan American Airways for service between the United States and New Zealand. The service is understood to be scheduled for initiation next August with flying boats.

The Austrians used chocolate bars for money, and only the upper classes were permitted to drink chocolate.

There are said to be 1,110 different kinds of animals and insects in the world, with thousands of varieties of each, including 120,000 types of spiders, 50,000 types of butterflies and 40,000 types of flies.

"Ramono Lili," the gypsies' own newspaper, has attracted subscriptions from all parts of the world since the first issue appeared recently in Belgrade, Yugoslavia.

Triumph For Science

Milk Dead Cow With The Aid Of Mechanical Heart

By means of an artificial heart the udder of a dead cow has been made to give milk. Dr. W. E. Petersen, University of Minnesota scientist, disclosed recently.

Dr. Petersen devised the artificial heart to aid him in studying the fat content of milk.

He said it led to a new and better test for butter fat. The new test is known as the Minnesota Babcock butter fat test, a refinement of the Babcock method, the scientist asserted. It enables creamery testers to obtain more accurate results.

Dr. Petersen said on one occasion he kept an udder "alive" for 15 hours, and milked it five times during that period. This was accomplished by prolonging circulation of blood through the udder by means of the mechanical heart and utilizing the animal's lung.

The lung also was kept active for the same length of time as the udder, he said. Both were affixed to the mechanical heart.

The mechanical heart is a revolving disc with an iron arm on each side. The arms are parallel but just out from the disc at different levels. As the disc revolves, propelled by an electric motor, the arms press rubber tubes through which the blood flows.

This gives the same pulsating effect as the heart in a living body, Dr. Petersen said. At first efforts were made to keep the udder alive merely with the mechanical heart but the attempts were unsuccessful because the blood deteriorated from lack of oxygen.

Dr. Petersen then added a lung taken from a freshly slaughtered cow. It was inflated and deflated by an automatic air hose. Before the lung was used the blood returning from the udder would be almost black, he said. When it was circulated through the lung it came out a normal color.

To keep it at body temperature, the blood is passed through a glass coil immersed in warm water. Thirteen pounds of blood are used.

Illuminated Highways

Cars Without Lights—Traffic Signals Received By Radio

Illuminated roads, on which motor car lights would be unnecessary, were envisaged by A. T. V. Robb, son, deputy secretary of the ministry of transport, at a combined session of the engineering and psychology sections of the British Association, which mainly dealt with road traffic problems.

"It may be that within the next decade, on all the more intensely trafficked roads, the approaching driver will see an oncoming vehicle, not as a couple of spots of dazzling light with a dark silhouette against an adequately illuminated background," he said.

The advances of recent years were still all dependent for their efficacy upon their visual perception by the driver of a road vehicle and his readiness to respond.

"The road driver of the future may hear traffic signals on his car radio set," said Mr. Robb.

A careful driver approached a rail road; he stopped, looked and listened. All he heard was the car behind him crashing into his gas-tank.

The term mandarin is applied in China by foreigners to government officials of every grade.

Extensive Travelling

Journalist Covers 1,250,000 Miles, Always Going Eastward

A man has come to Durban, Natal, who is 22 days younger than any man of his age in the world. He is Mr. M. Franklin Kline. Eleven years ago he set his face to the sun and he has travelled towards it ever since, completely looping first the Northern and then the Southern Hemisphere every year. He has thus been round the world 22 times in 11 years, and, as he has always travelled east, 22 days have been clipped off his life. "I've travelled 1,250,000 miles in my life, always east," he said, "and have never grown tired of it. There are too many interesting things to see. Anyway, I guess I'm wound up now and can't stop. I'm the editor and compiler of the official guide for shipping and travellers to the principal ports of the world, which is published by the Oakes Shoen Kaisha Company, Japan. I visit all the big ports of the world every year, meet the heads of business firms and interview them. I spend all my time in ships, writing and compiling my guidebook, which is published every year. I was born in Tennessee. I came to South Africa in 1904 and found a job in the mines. When the Zulu rebellion broke out in 1905, I joined up with the Transvaal volunteers. It used to be real fighting in those days. Mr. Kline became a journalist after the rebellion, and when in Japan he conceived the idea of issuing a shipping guide-book as a means of travelling round the world. This was so successful that he has continued travelling ever since.

Requests For Dionne Bowls

Premiums Have Been Given To People All Across Canada

That the Dionne Quintuplets are very dear to the hearts of the people of Canada is amply demonstrated by the tremendous demand for the "Quint" souvenir bowls being given away as premiums in connection with Quaker Oats. Although the premium offer was first made only a comparatively short time ago, already literally thousands upon thousands of requests for the bowls have been received from families all over the Dominion. Requests for premiums, according to The Quaker Oats Company, come from people in every rank of life, high and low, and from both men and women as well as children.

The premium offer of chromium bowls bearing a reproduction of the heads of the five famous babies in intaglio on the bottom, and their names carved around the rim, is being made to mark the fact that Quaker Oats was chosen by the best food experts in the country as the breakfast cereal for the children. The Dionne Quintuplets have been eating Quaker Oats regularly since their very earliest months.

Quaker Oats was chosen because of its remarkable richness in Vitamin B. Food editors of leading publications are constantly printing articles stressing the importance of this vitamin. They also recommend oatmeal because of its abundance of body-building minerals, such as iron, protein, and energy-making carbohydrates. So the "Quints" get bowls of Quaker Oats.

FROM GIRL TO WOMAN

Mrs. M. Vetter of 47 Birch St., Waukegan, Ill., said: "When I was a young woman I suffered terrible pain in my back and legs. I was told to stay in bed for several weeks, but I was not cured. I was then sent to a doctor who prescribed 'Violette Prescription.' I took it for a few days and I was cured. I feel like a new woman now. I am 35 years old and I feel like a girl again. I am very grateful to Dr. Vetter's Clinic, Buffalo, N. Y., for the wonderful medicine."

Flying Torpedo Boats

War Instrument Capable Of Sinking Biggest Battleship Afloat

Just as Germany started the naval world in 1930 with "vostpocket" cruisers, she has again, after five years of intensive experiments, sprung a new surprise in vestpocket torpedo boats—variously called death boats or flying torpedo boats because of their tremendous speed and flexibility. Carrying two torpedo tubes and capable of sinking the biggest battleship afloat, these "mosquito boats" of 200 tons can reach a speed of 60 miles an hour. For defence against the giants of other navies, they rely on this terrific speed, not armament, as they dart forward under cover of smoke screens, the technique demonstrated at the Baltic naval manoeuvres.

Earlier erroneous reports claimed that the vestpocket torpedo boats were manned by a crew of only five men, a "suicide crew" whose object in war would be simply to drive their little craft loaded with explosive straight into enemy battleships, taking their chance to survive by leaping overboard at the last minute. The United Press ascertained that the crews actually number 22, eight on deck, eight in the engine rooms and six officers.

Japan has not yet introduced chain drug stores. 2123

Here We Are Again!

Yes!... wise "roll-your-owners" are back again with Ogden's Fine Cut. Why not do the same and smoke the best there is, when it costs so little!

Don't deprive yourself of the smooth satisfaction only Ogden's can give you... and roll it in "Chantecleir" or "Vogue" papers, the best combination known.

FASHION FANCIES

HOME FROCK ASSUMES TAILORED SMARTNESS—HAS THAT ORDERLY LOOK—SUCH AN ASSET IN ONE'S HOME WEAR

By Ellen Worth
It's a charming model for matrons as well as smart youthful types. There's a slimming centre seam with plait at the front of the skirt and darts at the back, which cuts undue breadth and at same time, gives the figure a lovely tail appearance. See for yourself how utterly simple it is to make it.
A pretty ducky cotton print made the model pictured.
Wool challis prints are also lovely and dainty and beautifully, well, rayons in necktie patterns, are also excellent.

Style No. 497 is designed for sizes 14, 16, 18 years, 36, 38 and 40-inches bust. Size 16 requires 3 1/2 yards of 35-inch material for dress with either sleeve.
Patterns 15c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.
Let the new Fall and Winter Fashion Magazine assist you in assembling your family's fall clothes. There are designs for every type and every occasion. And of course one of our perfect-fitting patterns is obtainable for every design illustrated. Don't delay! Send for your copy to-day!

Grasshopper Menace

Infestation For 1936 Believed To Be Higher In Manitoba

Indications of grasshopper infestation for 1936 are much lighter than for many years. Dr. R. D. Bird of the Dominion entomological laboratory, Brandon, Man., told the Manitoba grasshopper control committee in Winnipeg.

The areas of heaviest infestation, according to indications of egg deposits in the soil, are in patches south and southeast of Winnipeg, said Dr. Bird, who has just completed a survey of egg beds. Lighter infestation is indicated over a wide section of the southwestern part of Manitoba.

Cat puppies keep best if floated on lukewarm water.

Prominent Writer Dies

Frank Yeigh Was Authority On Canadian Affairs

Widely known as a lecturer, writer and authority on Canadian affairs, Frank Yeigh, 75, died in Toronto after a brief illness.

He was born in Burford, Ont., and was educated at the public school there. After a period of secretarial and publishing training in Chicago he came here in the late 70's and became secretary to Hon. A. S. Hardy, first provincial secretary and later Ontario premier.

Later he became editor of the weekly newspaper, Canadian Advance. He married Kate Westlake, author of "A Specimen Spinster," in 1892. She died in 1906.

In 1908 he married Annie Louise Laird, daughter of Rev. Robert Laird of Kingston. He travelled through the British Isles and Europe in succeeding years and in 1920 became Canadian representative of the Save the Children Fund, an international organization sponsored by the League of Nations aimed at relieving distress among women and children.

"WOULD NOT BE WITHOUT SASKAL"

SAYS REGINA WOMAN

Indigestion Gone, Can Eat Anything

Read this letter: "For several years I had been troubled with indigestion and could eat very few foods which agreed with me. A friend of mine suggested that I try Saskal, which I did, and it has entirely relieved me and now I can eat anything. I would not be without a bottle of Saskal in my home, and I hope others may benefit as I have done when they know of your remedy in Saskal." For indigestion, biliousness and acidity, try the best and take Saskal. At all drug counters. Enough for 10 weeks' treatment, 69c.

The department of labor, made public the finding of Justice H. H. Davis of the supreme court of Canada, blaming loggers from the waterfront dispute which has been in progress at Vancouver since last June 5.

The corn borer is able to subsist upon all herbaceous plants and has already been recorded as feeding upon no less than 167 kinds of plants in the United States.

The Health Restoring Value of COD LIVER OIL PLUS

Easy Digestibility

Invalids struggling back to health need strong tonic and giving foods. SCOTT'S EMULSION is an emulsion of pure egg-packed Cod Liver Oil PLUS bone-building Hypophosphites of Lime and Soda. It is four to five times more easily digested than the highest grade Cod Liver Oil. These are PLUS VALUES you get only in SCOTT'S EMULSION.

Bran Scones

Sliced Pineapple
Tea or Coffee

Look for the Quaker Natural Bran display at your grocer's. He has all the things you need for this slimming, refreshing dessert. The recipe for Bran Scones is in the package.

Regular Aeroplane Service Across the Atlantic Appears To Be Nearing Realization

Prediction by Dr. Alexander Graham Bell shortly after the Wright brothers made their memorable first heavier-than-air machine flight at Kitty Hawk, North Carolina, that a regular aeroplane service across the Atlantic would be operated during the present generation appears to be nearing realization.

And a more important part of the prophecy, as far as Cape Breton is concerned, is that plans for the ocean service may call for a landing field at Sydney.

It is believed that Sydney is greatly favored as the terminus on the Atlantic seaboard.

Word from Montreal is to the effect that work is being rushed across Canada for completion of the trans-continental airway so that European passengers and mail would be less than three and a half days away from the St. Lawrence city next year, and less than five days from Vancouver.

Single unemployed men are constructing 114 landing fields across the Dominion at approximately 25-mile distances as part of a gigantic unemployment relief program. Most of these fields are nearly completed now.

Should the transatlantic service be developed, it is believed Montreal would be the main eastern terminal, with aeroplanes connecting there with the western routes. Maritime stops would probably be at Halifax, Fredericton, Moncton and Saint John.

The Canadian airway will go from Montreal to Elmdale by way of Ottawa, Elmdale, where a radio beacon is being operated will be the junction point for aeroplanes from Toronto and southern Ontario. Radio beacons are also planned for points near Cobalt, Kapuskasing, and Sioux Lookout, all in northern Ontario. Winnipeg, Brandon, Regina, Pelly and Lethbridge will have beacons, and a feeder line will connect with the Arctic air mail routes from Lethbridge.

Approximately 15,000 men have been employed on the airway construction plan. They are housed in camps and receive regulation army rations.

Sydney's city council appointed Mayor S. E. Muggall and City Solicitor F. M. MacDonald as a committee to gather all available data relative to a transatlantic base being established here. One of the chief advantages Sydney has to offer is that it is the only place on the Atlantic coast with sufficient landing space that is relatively free from fog the year round.

Aged Farmer A Knight

Has Made Numerous Priceless Gifts To Historical Museums

A farmer-knight has been found in Stockholm. For a long lifetime of devotion to the study of Swedish antiquities, a Swedish farmer, Mr. Christoffersson, has been created a Knight of the Royal Order of Vasa. Mr. Christoffersson, now 70 years old, still recalls studying his first archaeological book as a boy. Treasured specimens, found in the fields of his Province of Scania, were often thrown away as rubbish by his mother in those days. Since then, from his farmhouse collection, he has made numerous priceless gifts to the historical museums in Stockholm, Lund, and Trollhättan, and has gained fame among archaeologists or Sweden for his unusual knowledge of Scania's ancient history.

Bird Makes A Get Away

It's not a fish story that Dr. W. Connell, of Stratford, Ont., tells about the one that got away—it's a bird story. He said, and had been shooting pheasants, he had, and had been carrying two in a bag for about two hours when he heard a whirr—one made hasty exit from the bag and flew away.

Average farm values per head of sheep, swine and poultry in 1934 increased over those of 1933, cattle alone showing slightly lower values. Milch cows decreased in value from \$31 to \$29 per head, and other cattle remained unchanged at \$17. Sheep increased from \$4 to \$4.15; swine from \$8.50 to \$9.85; and poultry from 55 cents to 59 cents per head.

"Jack," said the plumber's wife as he was leaving home on a hurry call, "bring me a jar of cold cream from the drug store when you come back for the tools you're forgetting."

After hen eggs have been incubated four days in China, they are examined and the infertile ones are sent to market.

Storing Farm Machinery

Necessary To Protect Machinery From Ravages Of The Weather

Proper care should be exercised at all times to protect the large investment in farm machinery from rapid deterioration. Heat, moisture, wind, frost and direct sunlight are the most destructive elements encountered by farm equipment.

Storage means protection against these deteriorating effects during the inactive life of the machines and has been found by the Dominion Experimental Station at Swift Current, to be the greatest single factor in prolonging the life of farm machinery.

The most active period of deterioration is during the season of machine use. It is important, however, to protect machinery the year around from the effects of weather. Generous use of paint on all wood and metal parts, wherever the original has worn thin, and the removal to a dry shed of all blades, canvases, knives, ploughshares, cultivator teeth, etc., immediately the machine is out of use, will help prolong the useful life of the implement.

Pack all bearings with the correct grade of lubricant. Cover all exposed metal parts worn bright from use with old crankcase or transmission oil before putting the machine aside even for a few days. This will keep out all dirt and moisture from the bearings and off the wearing surfaces, thus preventing excessive wear due to rust.

Clean all seed from drill boxes, make sure that all dirt is removed from plough or one-way disk bottoms and that they are well greased before leaving. All straw, grain or weeds should be thoroughly cleaned from binders, combines, separators, cultivators, disks, etc., before greasing and painting for storage.

Bright sunlight and moisture cause exposed wooden parts to warp and crack; paint applied early will prevent this destruction. Metal parts exposed will rust and wear; grease or paint will save these surfaces.

In the storage of grain boxes, wooden drills, wagon running gears, and wooden separators is desirable, but not essential. Outside storage of machinery has been found highly successful at the above station when proper care has been exercised to protect against animals and weather by good fences, the use of paint and proper lubricants.

Cheaper Borrowings

Association Of Canadian Mayors Would Make Move To This End

Amendment by the King government of the Federal Interest Act of 1880 might result in a lower interest rate for Canadian municipalities on present and future bond issues. Mr. A. Bisset, of Edmonton, has suggested to the Montreal city council. He adds that power to call loans at five-year periods might also follow amendment to the act.

Ald. Bisset thinks the Association of Canadian Mayors might like to drive for the amendment in view of the move it made in Montreal last spring for cheaper borrowings. Under the Bisset proposition, outlined in a letter to Canadian municipalities having now, or in future, bonds on the market maturing more than five years hence would at the end of the five-year term have power to call those loans on payment of principal and interest to date plus three months' interest in lieu of notice. The Edmonton alderman believes mere existence of an amended interest act would induce holders of Canadian municipal bonds to accept interest more in accordance with lower levels ruling in current markets.

Wild Barley

Skunk-tail grass, or wild barley, is a native perennial occurring from Lake Superior westward, particularly in alkaline soil where better grasses cannot thrive. It is found occasionally in Eastern Canada. This grass is a serious enemy to western stockmen, being a source of injury to horses, cattle, and sheep through the barbed seeds and awns penetrating the soft tissue of the animals' mouths and causing irritation and inflamed ulcers.

Psychologists find that paintings placed near the entrance to a gallery in a museum attract more attention than paintings hung near the exit.

Motorists who drive at 60 miles an hour should also be able to think at 60 miles an hour. Which few of them can. 2123

OLYMPIC GAMES STIR CONTROVERSY

Principals in the vociferous verbal battle over the United States entry in the 1936 Olympic games at Berlin are Jeremiah T. Mahoney, right, of New York, president of the American Athletic Union, and Dr. Theodore Lewald, left, president of the German Olympic committee. Dr. Lewald declared "there is no question of religion in German sports" in reply to Mahoney's charge that Lewald was being used "as a smoke screen to conceal the German Government's most flagrant violations of Olympic ideals for fair play to all."

Comical Competition

Whisker Derby And \$100 Prize Helps To Promote Race

After 20 days of hair-raising competition, Andrew Duncan was chosen winner of Drumheller's "whisker" derby and a \$100 prize. His fertile face produced the best yield in a field of 27. David Jones was second-place by a close shave.

The contest, run by the Drumheller Miners Hockey Club, brought out hirsute hopefuls with everything from neat Van Dyke effects to uncontrolled coverings bidding for victory on quantity.

Disappointment of entrants who achieved only a dirty face effect was relieved by consolation prizes.

The present consumption of beef in Canada per head of population is estimated at 68.66 pounds (56.09 in 1933); pork, 66.36 pounds (74.58 in 1933); mutton and lamb, 6.28 pounds (8.32 in 1933); poultry, 9.9 pounds; butter, 30.82 pounds; cheese, 3.54 pounds; eggs, 22.31 dozen per capita.

Western Apples Win Prizes

Canadians Win Highest Possible Award At English Fruit Show

The department of trade and commerce recently announced it had received a cable advice a British Columbia apple grower had won the highest possible award at the Cardiff, Wales, Imperial Fruit Show.

The grower, James Lowe of Oyanas, B.C., submitted an exhibit of Canadian Delicious apples which was judged the champion dessert apple of the British Empire. Competition at the show was said to have been the keenest ever known.

The cable said an exhibit of Canadian Jonathan apples received high commendation and that Nova Scotia barrell apples in the Canadian championship class were of the highest quality and appearance seen on the British market.

Seventy Canadian exhibits were entered in the show.

When John Bull has his say, all the other powers listen intently.

The SNAPSHOT GUILD

LET'S GO HUNTING

It's the wise hunter who keeps his camera loaded and ready to snap the real story-telling pictures such as this one.

Don't these crisp, cool fall mornings sort of give you the hunting fever? In spite of all the pleasure you had during the good old summer time you probably look upon the fall hunting season as one of the highlights of the year, and as you sit enjoying a good evening smoke, isn't it a lot of pleasure to talk over the happenings of the day?

There should be more to a hunting trip, however, than tracking your game, or anticipating that tense moment when the snarl of a fine young buck make their appearance through the trees; or he carelessly makes a wild dash into the clearing and you put up a valiant fight against a revving attack of "buck fever."

The appearance of your game and the exciting moment when you quickly raise your gun to your shoulder and pull the trigger, is one of the thrilling adventures of a hunting trip.

There are, however, many moments of relaxation and leisure, too. It is then that you should do a different kind of shooting. "Shooting" with a camera should not be overlooked for it is with snapshots that you can make a picture record of your trip and enjoy your expedition over and over for years to come.

Your snapshots can picture your trip from the time you and your hunting pals lead your duffel bags, gun, blankets and other equipment until your return with no hope—your trophies.

Space will not permit enumerating all the picture possibilities on such trips. Picture taking opportunities, however, seem to have the habit of appearing at the most unexpected moments so it's the wise

hunter who keeps his camera loaded and ready for action. If you have never before taken snapshots under overcast fall skies it is important to remember that it will be necessary to give a longer exposure than ordinarily made under summer's bright sunshine.

But your snapshotting should not be confined to outdoor pictures for it is at night in the cabin or lodge you can take pictures of your party seated around the open fireplace swapping yarns and reviewing expeditions.

You will find that Photoflash bulbs will serve your purpose admirably. A Photoflash bulb is similar in appearance to a common electric light bulb and can be screwed into a special, but inexpensive holder, resembling an ordinary hand flash-light tube. This can be purchased at almost any store selling photographic supplies.

The flash is set off by pressing the flash button and it gives an intense light without any noise or smoke. After placing your camera on a tripod or some solid support look into the finder and be sure you can see all who are to be included in the picture. Set the diaphragm at f/8 or f/11, open the shutter after having been set for "time" and then flash the bulb. Be sure to close the shutter immediately after the flash.

It is not necessary to have the room in total darkness when the flash is made but be sure that a bright light is not shining directly into the lens of the camera.

Make your camera an important part of your hunting equipment and on your return have a picture story to show to your friends.

JOHN VAN GUILDER.

Protein Content Of This Season's Wheat Crop Is Shown To Be Higher

Friendship Chain Letters

Rural Districts Have New Way Of Quilting Patches For Quilts

Quilting bees have been popular during the depression days of Saskatchewan—housewives saved all the pieces of cloth available and made quilts instead of buying them at the stores. Clubs and societies held their bees and made dozens of quilts for institutions such as the orphanages, Indian schools, etc.

Now, however, there will be added zest in the popular pastime for it has come under the eye of some shrewd print manufacturers, say women who have received what is the last word in chain letters. Yes, the chain letter has gone right into quilting bee and it is captioned "The World's Friendship Quilt."

The letter runs on the same principle as all former chain letters, but there is no money to be sent. The receiver of the letter is asked to carry on the chain until her name appears at the top of the list, and at that time she will have 250 six-inch squares of print, that can be made into "beautiful and elaborate quilts."

Several organizations have already taken a lively interest in the new fad, and throughout the rural districts of the province, women are getting their letters daily.—Regina Leader-Post.

Seed Wheat

Advice Concerning Use Of Rusted Wheat For Seeding Purposes

On account of the wheat rust epidemic in the prairie provinces many farmers will be obliged to use wheat as seed which has been more or less injured by this disease. Many badly rusted samples have already been tested in the laboratories of the Seed Branch, Dominion Department of Agriculture at Winnipeg, Saskatoon and Calgary. Germination tests show that even very poor, shrunken kernels are capable of producing seedlings, but these seedlings are weak and spindly. It should be remembered that germination conditions in the laboratory are practically ideal, and that very many of the weak seedlings will not survive in the field particularly if soil moisture and temperature conditions are not favourable at the time of seeding.

Owing to the size of the rusted kernels there are very many more per bushel than in normal plump wheat. This means that in spite of injury rusted seed will give a good stand. However, the seedlings will be weak and subject to the attacks of root rot and similar diseases. Badly shrivelled seed should not be treated with formalin for the control of smut; instead copper carbonate or one of the dusting materials recommended should be used.

Rusted cereals should be well cleaned so that the heavier kernels are used for seeding. When the city authorities of Los Angeles sent out orders that Oliver Street was to be widened the owners of the Commercial Exchange called in and then constructed a new facade, but that would cost considerable money. It would be cheaper, it was pointed out, although more troublesome, to gouge five feet out of the centre of the building and pull the structure back to the rear half of the structure. This plan was accepted and for seventy-seven days builders have been at work cutting away five feet to provide more room for traffic on Olive Street.

When the cut has been made and the front section shoved back to meet the rear section, the two parts will be "sewed" together. When it is complete the structure will show no signs of the mass operation which it has been through.

First Metal Used By Man

Has Many Important And Valuable Uses In Industry

Copper is really worth its weight in gold because of its many important and valuable uses in industry. As a result of its great power of resistance to corrosion, copper is frequently found in its "native" state, and was, therefore, probably the first metal to be used by man. Traces of copper working, dating back possibly as far as 5,000 B.C., have been found in Palestine and Egypt, and the evidence suggests that the art of metallurgy probably originated in the valleys of the Tigris and Euphrates, said to be the site of the earliest civilization.

Copper objects have been discovered in Mesopotamia below the level of the clay deposit left behind by the Great Flood, which is believed to have occurred about 4,000 B.C. It is probable that the first melting of copper originated from the discovery of natural copper in the vicinity of Mesopotamia, below the level of the clay deposit left behind by the Great Flood, which is believed to have occurred about 4,000 B.C. It is probable that the first melting of copper originated from the discovery of natural copper in the vicinity of Mesopotamia, below the level of the clay deposit left behind by the Great Flood, which is believed to have occurred about 4,000 B.C. It is probable that the first melting of copper originated from the discovery of natural copper in the vicinity of Mesopotamia, below the level of the clay deposit left behind by the Great Flood, which is believed to have occurred about 4,000 B.C.

The lowly porcupine belongs to one of the first families of North America. A fossilized lower jaw found in the same River valley Idaho has determined its antiquity at between 2,000,000 and 10,000,000 years.

A slightly lower weight per bushel and slightly higher protein content than last year's corresponding grades were indicated in the milling and baking characteristics of the western Canada 1935 wheat crop in a report issued by the research laboratory of the board of grain commissioners.

Considering the general baking quality, said the report prepared by Dr. F. W. Geddes, chemist in charge, the No. 1 Hard to No. 3 Northern inclusive this year were not quite equal to the 1934 crop. In the lower grades, the wheat was either equal or superior. The report said this showed the difference in baking quality between the high and low grades was not as widespread as usual.

The rusted grades, Nos. 4, 5 and 6 special, possessed excellent baking strength although they produced comparatively low yields of flour which had a pronounced yellow color. The new garnet grades, No. 1 and No. 2 C.W., were of high test weight and high yielding capacity. Like the special grades, however, the flour was distinctly yellow.

Operating On Building

Cut Five Feet From Middle Then Join And Reuse

Instead of slicing five feet off the Olive Street frontage of the Commercial Exchange at the corner of Eighth Street, Los Angeles, Calif., to allow for the widening of the street, engineers have decided to cut away across the middle of the building and then roll the skyscraper back from the original building line in Olive Street.

The building is thirteen stories and the highest structure ever put on rollers, according to George B. Kress, of the Kress Housing Moving Company, which is doing the job. He estimates that he will have to slide some 6,000 tons of steel, brick and cement—thirteen tiers of offices and stores—five feet without disturbing street traffic or the tenantry of the building. It is perhaps one of the most delicate engineering jobs which has ever been undertaken in this country in many years.

When the city authorities of Los Angeles sent out orders that Oliver Street was to be widened the owners of the Commercial Exchange called in and then constructed a new facade, but that would cost considerable money. It would be cheaper, it was pointed out, although more troublesome, to gouge five feet out of the centre of the building and pull the structure back to the rear half of the structure. This plan was accepted and for seventy-seven days builders have been at work cutting away five feet to provide more room for traffic on Olive Street.

When the cut has been made and the front section shoved back to meet the rear section, the two parts will be "sewed" together. When it is complete the structure will show no signs of the mass operation which it has been through.

Special Whisky Trips

Ships Travel Through Cape Horn To Flavour Liquor

Whisky specially matured by a voyage round Cape Horn will soon be on sale in London. Shippers at Melbourne have just exported a consignment of eight casks with the specific instructions that on its sea voyage to England it must be carried round the famous storm-beaten Cape Horn. The searing shaking the spirit will probably receive as the ship punches through winter seas off this notorious piece of coastline is expected to give it a rare flavor. Port wine is sometimes taken on similar long voyages. The constant heaving of the ship and the movement of the wine inside the casks imparts to it an extra bouquet.

The year 1931 was an exceptionally healthy one in the United States and Canada, according to life insurance records, which show the lowest death rate on record for that year.

Man—"How long have you been married?"

Friend—"Let's see—I bought this overcoat I'm wearing six years ago."

"A man with black eyes has been vision," says a writer. We doubt it. Otherwise he would have seen the other fellow's straight left coming.

TRY IT SOON!

Breeding Field Corn At Brandon

Experiments Carried On For Over Fifteen Years

At the Dominion Experimental Farm, Brandon, Manitoba, corn breeding studies have been in progress for over fifteen years. At first all attention was given to earliness. By continually selecting ears from early maturing plants, a very early strain was produced. However, this strain possessed several undesirable features. It was too much of the dwarf type and produced too many suckers, and the ears were borne too low on the stalk. Improvement of the strain is being accomplished through two avenues, line crossing and a modified ear-to-row system. In the former, lines are established by inbreeding or self-pollination for at least four or five generations. These inbred lines are usually much less vigorous than open-pollinated plants yet they are valuable in fixing or establishing certain desirable characters. When inbred lines are crossed, the progeny in many cases is more vigorous than open-pollinated plants and gives greater yields both in earliness and seed.

The ear-to-row system is a mass breeding proposition in which the rows from ears making the best showing in previous tests are used as male parents. All other rows have the tassels removed as soon as they appear, so that all pollination is by the selected male rows. In 1932, ears were gathered from twelve hundred selected plants. Progeny tests have been made each year since and inferior lines eliminated. In the 1935 test only seventy remain and of these the best twenty-seven are used as male parents.

Marked improvements have been made in respect to height of plants, suckering and height of ear. Concerning the latter, the ears are borne well up on the stalk, few being less than twenty-five inches from the ground. To gain extra height of plant, it has been necessary to sacrifice a few days in earliness, nevertheless most of the best lines are still sufficiently early to mature seed under average conditions at Brandon.

Personality Operation

Removal Of Part Of Gland Cures Many Different Things

A new personality operation, which cures things like bearded ladies and distaste for husbands was described for the American college of surgeons recently on the eve of its annual convention at San Francisco.

The operation removes a little of the adrenal gland, the structure which supplies extra energy for anger and for fighting. This gland lies near the kidneys, and hasn't any direct connection to do with sex, yet strangely is the cause of upsets in masculine and feminine personality traits.

It is one of the endocrine, or ductless glands, which work in series like electric lights on the same circuit. The researches which led to discovery of the operation for personality were described by Frank Hinman, N.C., of the University of California medical school.

He said studies of the endocrines disclosed some of the puzzling intermixtures were the connection of the adrenal gland, called the suprarenal cortex.

When this cortex gets too active in a child before birth, it can cause a switch in sex. After birth sex cannot be altered, but this cortex possesses the power, if it becomes overactive, to affect personality at any period of life.

Automobile Accidents

Death Toll In United States Reaches Large Figure

The Washington census bureau counted 1934's automobile death toll at 33,980, a fifteen per cent. gain over 1933 and "a new all-time high."

It averaged the death-rate at 26.9 persons out of every 100,000. In 1933, the rate was 22.2. In 1934, in addition, 1,789 persons were killed in collisions between automobiles, railroad trains and street cars.

After figures covering 86 major cities for the 52 weeks ended Sept. 28, have indicated the death rate was continuing upward in 1935.

"Ah, Mr. Perkins, I believe you have my nephew working at your office."

"Not to-day. It's the first ball game to-day, and he's gone to your funeral."

A municipal hotel where the poor can get a bed for the night for two coppers—less than one-half of a Canadian cent—has been opened at Hankow, China.

PREPARING TO SEARCH FOR THE GOLD OF THE SPANISH ARMADA

A fresh "gold rush" for the treasures of the sea-bottom has been started by a syndicate formed in Holland which hopes to raise billions valued at many millions of dollars from the ships of the Spanish Armada which are lying on the bottom of the sea in the Bay of Tormorey, Scotland. Here is a picture of a small model of a new giant salvage apparatus invented by the Dutch engineer W. van Wienen, which will be used during the salvage operations. This apparatus consists of a big tube giving entrance to a wide diving-bell which is illuminated and has communication by telephone with the staff above water.

World Distance Record

Use Specialty Constructed Experimental Craft For The Trip

A world distance record for seaplanes was claimed a short time ago by six United States navy flyers after a 3,387-mile non-stop flight from Panama in a newly designed ship.

The twin-motored craft, commanded by the navy's distance flyer, Lieut. Commander Kneffer McGinnis, glided to a landing at Alameda, Calif., at 2:21:15 p.m. (5:21:15 p.m. E.S.T.) 34 hours and 51 minutes from Panama.

Commander McGinnis said he believed the flight from Panama would better the seaplane distance record held by Carlo Spofford, Italian flyer. Spofford's mark is 3,063 miles, made in a light last July from Malfalco, Italy, to Berbera, British Somaliland.

To be considered a record, the mark must better the Italian's record by 100 miles.

The seaplane is an experimental craft which utilizes new principles in design. It has pontoons which form wing tips while in flight and are dropped into landing position before it alights. This reduces wind resistance.

A whale like tail is constructed to avoid damage in rough water landings. The body is below the wing and a navigator can sit in an open cockpit for observation.

Find Soil Worth Money

Kobe, Japan, may get an unexpected \$150,000 from the sale of soil being excavated for the foundations of the new city hall and the leveling of the site. It was originally intended to use the soil, which is very sandy, in a reclamation project east of the city, but an engineer of the Electric Bureau made the discovery that the soil is particularly suited for moulding purposes. There will be no trouble in disposing of it to engineering firms.

A cubic mile of water contains more than 1,100,000,000 gallons. And there are about 327,672,000 cubic miles of water in all the oceans of the world.

Heavy Voting

Record Number Of Ballots Marked At Federal Election

Canada's voters marked a record number of ballots on Oct. 14, it is disclosed by revised but still incomplete compilations by the Canadian Press of the voting by parties and provinces. With final reports still to come from many distant ridings, the survey showed that 4,022,567 of the 5,917,387 listed voters went to the polls.

Never before has the total Canadian vote topped the 4,000,000 mark. The previous record, set at the 1930 election, was 3,898,995. The proportions of the vote by parties were not materially changed from those shown in the first Canadian Press compilation the day after voting.

The incomplete major-party vote compared to that in 1930 follows:

	1935	1930
Conservative	1,222,250	1,909,955
Liberal	1,877,460	1,714,880
C.C.F.	337,832	
Reconstruction	373,479	
Social Credit	137,493	
Others	74,053	274,180
Total	4,022,567	3,989,995

Monument To Bombing Planes

Erected In England To Commemorate Action Of Lord Londonderry

A monument, consisting of a stone model of an aerial torpedo mounted on a pedestal bearing the inscription: "To those who in 1932 upheld the divine right to use bombing planes," was unveiled recently at Woodford, England.

The promoters of the monument, among whom was the crusading Sylvia Pankhurst, said it was intended to commemorate the action of Lord Londonderry and other British representatives in Geneva "by whose opposition the proposal to outlaw bombing planes was defeated."

R. R. Zaphiro, secretary of the Ethiopian legation, unveiled the monument.

Teacher: "Is it possible to have a sentence without a verb?"

Son of a judge: "Yes, sir. 'Thirty days'."

Speedy Travel

Great Strides Made In Railways During Recent Years

These are days of great achievements in speedy travel. It is not long since the railways had an exhibition to demonstrate a century's progress since the first locomotive "speeded" along at 12 to 15 miles per hour, to the amusement of all beholders.

But a museum of locomotive relics is increasing and two of the more recent examples from the Caledonian system—No. 23, the last single driving wheel express engine, and No. 103, the old Highland Railway engine which was the first of the 4-6-0 wheel arrangements now so general—are being withdrawn for preservation as relics in their original form at St. Rollox Works.

Some of the more modern types will doubtless in turn become relics, as the new locomotive, "Silver Jubilee," to run between King's Cross and Newcastle, is to cover the distance at an average speed of over 67 m.p.h., which puts the 11.7 m.p.h. of the Flying Scotsman into the shade. This accelerated speed cannot be restricted to England, and one may foresee the day when Edinburgh will be brought within six hours of London—Brought within six hours of London—Brought within six hours of London—Brought within six hours of London.

Valuable Porcelain

Discovered By An Expert At A Loan Exhibition

Five rare pieces of Worcester porcelain, only "discovered" through the visit of an expert to Worcester, have lain for years in the home of Henry A. Bulwer. The pieces, featuring a rare old design, stated to be unavailable even at the Royal Porcelain Works in Worcester, are worth more than \$800.

Of the practically unknown "feather" pattern, the pieces were turned out by the famous factory at the time the shadow of Napoleon was falling across Europe. They were given to Bulwer's mother as a wedding present by his grandfather, and were never shown to the public until last spring when they were included in a loan exhibition of Worcester ware.

Two Clever Women Workers

One Specialized In Mine Lighting, The Other An Engineer

Miss Monica Maurice, a brunette, with the slender, shapely groomed outline of the moment, beautiful composed features and smiling eyes is the modern "lady of the lamp."

As manager of a large lamp-making company she has for four years been responsible for the planning and operation of lamps at collieries in every large coalfield in England.

She does much of her work in the mines. This entails her driving an average of 23,000 miles a year.

She hopes to save much time in the future by flying, for she has just obtained her certificate. She is the first woman in Sheffield to do so.

One of her aims is to bring about an international standard for mine lighting.

To this end she has read many papers at international meetings of mining and illuminating engineers in France and Germany, her first when she was 21. She spoke the native tongue in each case, and took part in the highly technical discussions.

To prepare herself for her job, Miss Maurice studied at the Paris Sorbonne and Hamburg University, qualified as a shorthand writer and typist in three languages, visited the coal mines of Westphalia, and worked in the shops of the world's largest mine lamp makers in Saxony.

She plays as hard as she works, and is an expert rider, swimmer and dancer. Her favorite recreation is what she calls "week-end acrobatics."

Another remarkable woman is Miss Verena Holmes, a fully qualified mechanical, metallurgical, locomotive and marine engineer with several patents to her name.

One of these, Holmes' poppet valve gear, is used in Diesel engines. Another is incorporated in all modern locomotives.

Her chief job is the testing out of inventors' ideas for patents to insure their practicability. She is one of a handful of people qualified to do this highly specialized kind of work.

Super Traffic Policeman

Device Cuts Force Of Waiting Of All Vehicles

A new wonder of traffic control has made its appearance in London, England. It is called an "integrator." It is a sort of super-traffic policeman in a little box. It could be heard faintly ticking through its metal cover at Marylebone Circus.

It adds and subtracts the number of vehicles in its "area" although some of them are half a mile distant and hidden by tall buildings.

The "integrator" will shortly be installed, wherever useful, in different parts of London.

Briefly this is what it did one day in Gloucester Pl., W.—a road much used by private cars avoiding Baker St. to reach Marble Arch from St. John's Wood. Lights are installed in Gloucester Pl. at the blind crossroads.

The "integrator" kept on counting the number of cars in the major road, and gave them the main right of way. When one car only appeared, the road was closed to the device, noted the fact, but allowed the main traffic a fairly long stop-free period by maintaining the lights at green.

When two or more cars wished to cross the main stream the "integrator" shortened the stop-free period by a few seconds.

Quickly the main stream was halted. And immediately the Gloucester Pl. traffic was liberated.

When there was a lull in the main stream the side road vehicles were given the "go" signal with a delay of not more than a second or so.

The "integrator" cuts down the period of waiting of all vehicles, side road or major road.

Trade With Russia

Montreal Manufacturers Would Ship Clothing To Soviets

Anxious to export large quantities of made-up goods to Soviet Russia, a group of men's clothing manufacturers in Montreal is prepared to form a special finance corporation to achieve that end and is in communication with Hon. T. D. Bouchard, provincial minister of municipal affairs, trade and commerce.

On behalf of the group, Aid. Joseph Schubert announced that should negotiations for resumption of full trade between Canada and the U.S.S.R. follow Mr. Bouchard's conference with the Soviet ambassador at Washington, the clothing trade would like to be borne in mind.

One of the forerunners of the automobile and the motorcycle was a bicycle propelled by steam. It was built in 1855 and is now owned by a Philadelphia man.

U. S. Population

Prediction Is Made That It Will Not Increase After 1960

The New Dealers predict a static population for the United States by 1960.

After another quarter century, the population of the country will cease to grow, causing upheavals in the economic and personal affairs of the nation's citizens, according to the National Resources Committee, a body created by President Roosevelt to "plan" the future of the country.

The committee based its conclusions on reports from various state planning boards.

The national committee made no attempt to estimate the total population of the country in 1960, but pointed out that with no further increase in the buying power, progress after 1950 will depend on raising living standards. Birth rates will cease their present decline and aged persons will fill places in industry now filled by youth, according to some of the forecasts.

The New Dealers report that their studies indicate that following future developments:

"That the population of the United States will become stabilized about 1960;

"That future population distribution will depend in large measure upon the development of the country's natural and industrial resources;

"That during the next 25 years, proportion of the population over 40 years of age will be approximately doubled;

"That the number of young people under twenty years will decrease in about the same amount as those over 60 will increase;

"That the occupational characteristics of the population will change and that as the mechanization of agriculture and industry increases, opportunities for employment in such new fields as education, conservation, recreation and service occupations will increase."

Canadian Dressed Poultry

Large And Increasing Shipments Being Made To British Isles

There has been an exceptionally good market for Canadian dressed poultry in the British Isles this year. From January 1, to September 30, 1935, a total of 2,331,165 pounds of chickens, turkeys, fowl, ducks, and geese have been shipped from the Dominion, compared with a total of 832,090 pounds for the corresponding nine months of 1934, and 4,375 pounds for the similar nine months in 1933.

Of this year's shipments, 1,689,750 pounds were chickens, 570,625 pounds were turkeys, 30,440 fowl, 47,800 pounds ducks and 2,500 pounds geese. The British Isles import annually about 45,000,000 pounds of poultry and according to the Dominion of the Poultry Service, Live Stock Branch, Dominion Department of Agriculture, Canada has never had a greater opportunity than at present to get a share of that market. As a result of this, the volume of poultry exported from Canada prices have advanced to Canadian producers. If, however, Canada desires to continue to hold the British market, more attention must be paid to producing milked A and B grades. The majority of poultry that has been exported has been Selected B and C grades, the two lowest commercial grades. Reports received by the Dominion Department of Agriculture from Great Britain would indicate very clearly that better than Selected B and C grades must be shipped if the market is to be held. The production of milked birds is comparatively easy. All that is required is to crate fatten them from two to three weeks before killing, on a ration of equal parts of ground oats, wheat, barley or buckwheat, mixed with boiled potatoes at the rate of about one-third of the volume of meal mixture and then mix with four milk.

The greatest demand for chickens in the British Isles is for birds of four pounds and under when dressed.

Cross-Bred Wool

The wools of prime interest in international trade are merino and cross-bred. Canada, New Zealand, the British Isles, Irish Free State, Argentina, Uruguay, Chile, and Brazil (which also grows merino) and Spain (which also produces carpet wool) are producers of cross-bred wool.

Merino is the prevalent type of wool of Australia, Union of South Africa, and the United States. Carpet wool is turned out by Soviet Russia, China, India, French Africa, Turkey, Iran, Syria, Peru, Bolivia, Mexico, and Ecuador.

A door-knob is a thing a revolving door goes round without

This twisted framework above is all that remains of the giant 22-passenger plane which crashed at Troy, N.Y., causing the death of Captain Harry Hubbell and serious injury to Miss Ruth Nichols, noted aviatrix. Four other passengers were slightly injured.

Do You Ever Wonder

Whether the "Pain" Remedy You Use is SAFE?

Ask Your Doctor and Find Out

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

THE person to ask whether the preparation you or your family are taking for the relief of headaches is SAFE to use regularly is your family doctor. Ask him particularly about "ASPIRIN."

He will tell you that before the discovery of "Aspirin" most "pain" remedies were advised against by physicians as bad for the stomach and, often, for the heart. Which is food for thought if you seek quick, safe relief.

Scientists rate "Aspirin" among the fastest methods yet discovered for the relief of headaches and the pains of rheumatism, neuritis and neuralgia. And the experience of millions of users has proved it safe for the average person to use regularly. In your own interest remember this.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get "ASPIRIN"

Toronto To Be Quiet

Toronto citizens have many ideas toward the elimination of noise that disturbs their sleep. Action proposed by citizens included rubber shoes for milkmen, rubber baskets to carry milk bottles, rubberized wheels for street cars and a soft composition street car track.

India has a rural-uplift campaign.

SETTLING QUARRELS WITH SALT

In far away Borneo, so great is the respect for Salt, that quarrels are settled by exchanging lumps of this precious necessity, vital to life itself. Wouldn't you like to read this and many other gripping facts in new booklets for Children? "Salt all over the World". Quaint, superlatives, customs and stories! Stir the imagination! Educational! Free—send coupon now!

NERVOUS? Salt rubs, while taking the bath, are refreshing, restful for everyone.

"On a Wide River To Cross"
"The Unknown Port", Etc.

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. Nancy set out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and miss the path Aurora Tubbs had told her to follow. A truck then came along the road, driven by Matt Adams, and she awoke him while way to go. They ascended the hill, and then on to the top of the hill. There, Mark Adam tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been hired to help with Luke's leg gets better. With Jack away, Nancy finds that she is lonesome, and having no books to read, the idea of starting a public library at Pine Ridge seems a good one, and Nancy writes home to get her parents to send all the books they could spare and all they could induce others to let them have.

Nancy's parents and friends gave their liberal support to her request for books, and a sizeable box arrived in due course. Father Adam painted a sign for the library, and the Adam boys worked on the shelves for the books and decorations to make the room look presentable.

Jack Nelson, Matthew Adams, and Nancy go to the prairie home of Matthew Adams for the ride, and after Nancy and Jack leave for home, they are caught in a blizzard. Blinded by the swirling snow they collide with a full of school children, which was stalled across the road with its back wheels resting in a snow-filled gully. They can be wrecked, Jack and Nancy stay to help. The next morning Jack sets out for help in the blizzard. He succeeds in finding help, and the party of children and Nancy are rescued. As a result of the exposure Nancy's feet are badly frozen and Jack is seriously ill with pneumonia, but both of them recover.

Now Go On With The Story

CHAPTER XII.—Continued

"The same, lady—or one branch of it anyhow; and after last night's rain the brooks and rivers will be full. You'll lose your mind over the road ahead, Nance."

Mark was right. They followed a mountain stream bordered by giant fir and quaking aspens. The mountains were greener here. "More friendly," observed Nance. "More like New England." And after a camp-fire lunch, with the historic Platte rippling peacefully at their feet, Cousin Columbine told some of the old tales which never failed to stir her audience.

"When we get home," Jack prophesied, watching his sister's rapt countenance with some amusement, "Nance will bore all her friends with stories of pioneer days in Colorado, and storm the library for literature on the subject."

Father Adam looked up with a smile.

"In that case, I've a little book by a young Englishman which I'll present to you, Nancy. It's worth reading."

"You mean the fellow who landed at Vera Cruz, came up through Mexico and camped for a time at South Park—Baylor Salade, they called it then?" asked Matthew.

His father nodded, and went on: "I wish I could recall something one of our western poets wrote about him. It says:

"Alone through dusky he sat—
Safe in Bayou Salade above the Platte,
Safe from the rumbling dust to Santa Fe,
Cool in the woven spruce that curtained day.
While . . ."

John Adam paused, unable to remember further, and to the surprise of every one, Matthew, dreamy eyes watching the river, continued:

"While good Panchoito browsed along the sage,
Beyond the picket line, it was an age,
Of picket fires,
Broiled beaver-tail was good,
Better than dripping hump-ribs,
—cedar wood.
Was sweet in rapping, snapping,
crackling briars,
Alone, the boy, Bayou Salade, and Night!"

There followed a moment of appreciative silence as Matt ceased speaking. Then Luke exclaimed with admiration: "Good brother how'd you ever remember that?"—while Nancy, realizing that with this honest praise Matthew's self-consciousness had returned again, tactfully drew attention away from him by saying:

"Did any of those old, old Spanish expeditions come this way?"
"I couldn't say, my dear," responded Cousin Columbine. "They may possibly have passed near Pine Ridge, though that, I believe, has not been proved."
And no one dreamed that the girl who sat there, lost to the present in visions of other days, was to discover what looked, astonishingly like the missing proof.

CHAPTER XIII.

It was on the fourth of July when Jack announced at breakfast that with their departure only two days away, the time had come to tackle the sagging gate posts.

"You can't put me off another hour," he insisted (when the old lady said: "Butter those posts, Jack. Don't waste your strength on 'em"), "I'm two pounds heavier than before the blizzard, Cousin Columbine, thanks to these lazy days and Aurora's cooking; and those posts give me the heebie-jeebies. If there were time I'd paint the house for you too."

"You may have that to look forward to when you come again!" she responded, endeavoring to speak briskly. "I hope your father will consider John Adams' offer of a job for the winter, Jack, and send you back to us. As for Nancy—I don't dare think how still the house will seem without her. I felt like a lost soul the days you stayed at Prairie Ranch."

For the visit to "Uncle Tom's" was over—three days that had softened the memory of those cruel, windswept plains, leaving instead a vision of flower-dappled prairie.

"If it weren't for this stack of newspapers and letters," Nancy confessed the day she stowed them in her trunk, "that whole ghastly experience would seem a dream."

"A nightmare, I'd call it," corrected Aurora. "Victor Tubbs says I lost ten pounds during that blizzard; and as for Miss Columbine, she'll never be the same woman again. It's my opinion that if Eve and John Adam hadn't took their lives in their hands and drove down here to keep her company, she'd have lost her mind."

"And it's my opinion," retorted Miss Columbine, who had come in unobserved, "that you were in a lot more danger of losing yours! Don't talk nonsense, Aurora Tubbs."

Nancy laughed at the time, even though something told her that in a measure Aurora was right. One pays toll for hours like those, and Cousin Columbine had not escaped. The old lady was a shade less brisk, less energetic; and Nancy hated to think how lonely she would be when left with only Aurora Tubbs for company. "If I were twelve or thirteen, I'd be in two places at once," she confided in General Grant as she undressed one night, "it would solve the difficulty. What's the use of being a great general, anyway, if you're incapable of advising me, Uncle Tom?"

But if the General saw a solution of the problem, he kept it to himself; and the days passed with Cousin Columbine looking a bit grim when she thought of one noticed, and that was Adam losing his appetite to an extent that alarmed his troubled mother. And now tickets and reservations were ordered. Mary Taylor had promised (with Luke's assistance) to watch over the Adams Library; and Nancy was conscious of a new sensation, something she described to herself as "a sinking feeling down inside," each time she caught a glimpse of the unasked question hovering mutely, hopelessly, in Matthew's expressive eyes.

Now is the Time For This Help in Preventing Colds

Formula Especially Designed to Aid Nature's Defenses in Nose and Upper Throat, Where Most Colds Start.

PART OF COLDS-CONTROL PLAN

Don't wait for a cold to develop—or get you down. After any unusual exposure, head that first warning nasal irritation or sneeze—apply a few drops of Vicks Va-tro-nol up each nostril. Used in time, Va-tro-nol helps to avoid many colds.

Va-tro-nol is especially designed to aid and greatly abate the functions provided by Nature—in the nose—to prevent colds, and to throw off head colds in the early stages. Where irritation has led to a clogged-up nose (in stuffy head cold or nasal catarrh) Va-tro-nol spreads through the nasal passages—reduces swollen membranes—clears clogging mucus—brings comforting relief.

For Fewer and Shorter Colds

Note for your family: Vicks has developed, especially for home use, a practical Plan for Better Control of Colds. This commonsense guide to fewer and shorter colds has been clinically tested by practicing physicians and further proved in everyday home use by millions. Full details of Vicks Plan come in each Va-tro-nol package.

Anticipating Death

Right Of Person To Take His Own Life In Certain Circumstances

The right of a person to take his own life, in certain circumstances, would be legalized under a bill prepared by Lord Moyrnan, a past president of the Royal College of Surgeons, it was reported in London.

Suicide is now a "crime" in English law. Certain members of the clergy are said to regard Lord Moyrnan's project favorably.

Under Lord Moyrnan's plans, a person afflicted with a painful and incurable disease could request his attending physician for the privilege of "anticipating death" by euthanasia, or painless killing, to be performed under the direction of the physician.

Such a request would have to be accompanied by a sworn statement to the effect that the doomed person's affairs were in order.

The Tallest Soldier

The tallest soldier in the French army is causing the French ministry trouble. Robert Thierry, aged 20, is six feet six inches tall and joined the 10th Colonial Infantry Regiment. When he arrived, a special uniform had to be made for him. He is complaining now that his bed is not long enough to sleep in comfortably. A special one will have to be made.

Radishes were prime favorites as vegetables in ancient Greece.

Accidental Discovery

Explosive Discovered Valuable Because Of Cheap Chemical Ingredients

Discovery of a new explosive of "high shattering power" in the remnants of a laboratory experiment which "went wrong" was announced by Professor A. T. Bowden, head of the College of the Pacific Chemistry Department at Stockton, Calif.

The explosive, Professor Bowden said, might prove of considerable commercial value because of its cheap chemical ingredients. Last year, he said, a minor classroom explosion resulted from an experiment which had been performed successfully hundreds of times before. Seeking conditions causing the blast, Professor Bowden and a group of students made the discovery.

Valuable Bowler Hat

Impressed by the bowler hats worn by distinguished Englishmen, the King of Cambodia, in French Indochina, has ordered a state bowler. Trimmed with jewels with a magnificent clasp of brilliant worn as a cockade the crown bowler is preserved for exceptional occasions. It is stated that the hat has cost \$4,000.

Mrs. Peck—Now, Henry, what are you thinking about? I can always tell when you have some thought that you are trying to conceal from me. Out with it!

Henry—I was just wondering what the Mormons could see in polygamy.

to Calgary on Saturday, returning

Sunday evening.

Miles Fike returned from Leth-

bridge Wed. where he has had a

Gov't. job for the past thirty days.

Dick Nichol took in the sights in

Calgary on Saturday and had some

mental work done.

Miss Mildred Hyde of Edmonton

was a week-end visitor at the home

of her parents, Dr. and Mrs. S. H.

McClelland.

Miss Myrtle Methers of Edmon-

ton spent the week-end at the home

of her parents, Mr. and Mrs. J. P.

Methers.

Miss Oelta Bills left for Van Nuys

Calif. on Monday, after spend-

ing the past few months with her

father Mr. R. Bills.

The Chicken Supper and Dance

to have been held in the Madden

Community Hall on Friday Nov. 8

has been postponed.

The Local School is closed Thurs-

day and Friday of this week, owing

to the teachers attending convention

at Calgary.

The Wednesday half holiday is

again being observed in town and

places of business will close at 1.00

o'clock noon.

"Murph" Sackett returned to

town this week from Drumheller,

where he has been working for the

past few months.

J. M. Williams, who was a patient

in the General Hospital, Calgary,

for several days last week, recovered

sufficiently to return home last Sun-

day evening.

Roads are badly drifted, and on

Friday last, one farmer got stuck

within two miles of town with four

horses on a bobsleigh with a load

of coal.

Monday was "pay day" at the

Local School, the successful stu-

dents, at the last School Fair, get-

ting their prize money. Some of them

would not have changed places

with a King afterwards.

Walter Thome has been snow

bound in Crossfield since Monday

with 200 head of sheep, and the

indications are that it will be some

time before he will be able to drive

them overland to Madden.

We were wondering if the Vill-

age Council had rented the main

street as a parking space for old

cars. They are dangerous to the

travelling public and certainly most

unsightly.

How about having some of the

Village employees shovel the snow

off the main street crossings and it

would add to the convenience of

the fire brigade, if a little snow was

removed from in front of the fire

hall.

High School Students
Do Well in October Tests

Winnie Tredaway in Algebra II.
Clara Calvert in Geometry II.
David Wylie in Geometry II.
Lorne Sharp in History III.
Billy Harrison in Physics I.
Arthur Baker in Physics I.
Valma Pogue in French I.
John Carmichael in French I.

Outsiders Views of Alberta's
Social Credit M. P's.

Mr. Aberhart and his Social Credit Disciples have a heavy responsibility to bear. They have swept aside in cavalier fashion a group of men who, for fourteen years at Ottawa have fought for all that lends virtue to the Social Credit gospel. By common consent the United Farmers of Alberta members of the last House of Commons were one of the ablest and best informed groups of men in Parliament.—Montreal Witness.

The Social Crediters will find themselves tackling a monetary wilderness at Ottawa, and they will lack the help of anyone who has ever been that way before.—Vancouver Province.

Alberta voters have made a free choice, which is their right, but long before 1940 they will regret that they kept their U. F. A. group at home and sent fifteen half-baked amateur economists to Ottawa.—Winnipeg Free Press.

Notice

NOTICE TO RELATIVES OF PERSONS ON THE ASSESSMENT ROLL AND TO TENANTS.

NOTICE is hereby given that during the months of October and November, applications may be made under the provisions of section 168 of The Village Act for inclusion in the voters' list of the Village of Crossfield.

The wife, husband, father and mother and every son and daughter of any person whose name appears upon the assessment roll are entitled to be placed upon the said list—

(a) if he or she is resident with the said person within the village or assists him in a business in respect of which he is taxable; and

(b) if he or she is of the full age of twenty-one years; and

(c) if his or her name does not already appear on the roll; and

(d) if he or she duly makes application in accordance with this notice.

All tenants who have rented an assessed parcel for a period of twelve months immediately preceding the last day of September of this year, and who duly make application during the months of October and November, are entitled to be placed upon the said list.

For this purpose the office of the secretary-treasurer will be open during the usual office hours every day in the said months which is not a legal holiday.

T. Tredaway,

Sec.-Treas.

Along Broadway.

Mr. Comden getting his usual free lunch at Bill's lunch counter. Tom Tredaway "savagely" attacking a snow drift. Doc. Whillans telling how Mr. Aberhart turned the Parliament buildings into a canning factory. Fred Collins swanking a round in his new seven dollar auto. Len Xmas working off a little of that "thick smooth" wielding a snow shovel. Stan. Fawcett, former editor of the Crossfield Chronicle, celebrating his Mexican divorce. Fred Stevens doing his boy scout deed on Tuesday. The Citizens offering up thanks that the snow filled the chunk holes on main street. Vince suggesting that people should have regular visiting hours. Bill Blackadder deciding to go to Calgary for his groceries on Wednesday afternoons. G. Y. McLean in his second childhood stealing a sleigh ride home. Mack getting an early start for Monday. Dad Hall making fire wood with his one lung engine on a buzz saw.

Aimee Tells Her Story

News dispatches say that the Evangelical Aimee Semple McPherson Hutton, is to make her debut in Edmonton this week and will tell the story of her life history, including her relations with her last husband, David (what-a-man) Hutton.

Boy oh boy, what a story?? It has been suggested that the story be censored before being made public.

The curlers at Carstairs are preparing for an early start, and commenced flooding last week.

The weather, after being down to 15 below zero, has moderated considerably since Sunday when a chinook arrived accompanied by rain. A further 3 to 5 inches of wet snow fell on Monday night making it real sloppy underfoot. Today the snow is still thawing and the cars are starting to move again.

B. of T. Banquet Postponed

It is unfortunate that the Banquet on Wednesday Evening of this week in honor of the Drumheller Board of Trade, had to be postponed owing to the weather, because we have every reason to believe that our local Board would have had a splendid response from the community in the first of their get to gether meetings for the winter months.

The Secretary of the Board of Trade has received a letter from Pete Knight, who is now at Omaha, thanking the Board for the telegram sent him last week to New York. Pete states he has had good luck this year, having won three out of five of the large shows, Salinas, California, Pendleton, Oregon and New York.

Card of Thanks

J. M. Williams wishes to thank all his friends for their many kindnesses to him and his family during his recent illness.

Card of Thanks

We wish to thank most sincerely all our friends for their many kind expressions of sympathy and assistance during our recent sad bereavement.

Mrs. T. S. Ferguson and Family,

Proclamation

I hereby proclaim Monday, November 11th. (Remembrance Day) a Civic Holiday. All places of business to remain closed.

All citizens will govern themselves accordingly.

Wm. Wood, Mayor.

A large number from Crossfield left for Calgary over the week-end to sign up to go out to the Government relief camp—to be guests of Mr. Aberhart for the winter.

The regular monthly meeting of the Floral Local U.F.W.A. will be held at the home of Mrs. H. Stewart on Wed. Nov. 13 at 2.30 p.m.

LOCAL NEWS

Dick Ontkes is developing into quite a chicken farmer. He has a nice pen of Rhode Island Reds and also one of White Leghorns. His Leghorns started to lay on October 8th and have gradually increased production since that time. On Tuesday last he collected 36 eggs from his pen of 54 pullets.

Mrs. H. D. Clark and Mr. G. Jones of Nanton, and Mr. L. H. Jones of Vulcan were visitors at the home of their brother M. N. Jones on Monday and Tuesday of this week. While here they visited their grandfather who lives in the Cremona District and who has been quite ill.
